BLUE BOOK FOR THE REGISTER TRADE

COMPRISING ILLUSTRATIONS AND PRICE LISTS OF STEEL STEE

The Perfosteel Campany

(Texeland, Ohio.

Perrosteel ...

It is well known

THAT-

Steel is made specially suited for certain purposes.

A steel is made for Fine Edge Tools, another for Cutlery.

A steel is made for Rails, another for Carriage Work.

A steel is made for Agricultural Machinery, another for the Superstructure of Buildings.

Ferrosteel, however, is produced especially for high grade castings.

Ferrosteel produces smooth castings.

Ferrosteel has great strength.

Ferrosteel has great powers of expansion and contraction.

Ferrosteel will stand the strain of extra hot fires without giving out.

Ferrosteel is not liable to warp.

Ferrosteel . . .

Has all desirable properties for Register construction.

... The Faces ...

have unusual strength and at the same time are smooth, and designs handsomely brought out.

(Ferrosteel produces handsome designs and delicate tracery in a superior manner)

... The Boxes ...

Comprise the parts to be drilled and tapped, and Ferrosteel is of such even texture that threads do not break out when the bolts are driven to place.

The threads also have great holding power, as they are uniform throughout.

... The Wings ...

are of even thickness and straight, enabling them to be fitted accurately, and when closed, all of the heat is shut off.

... Heavy Faces ...

in Composite Lattice Pattern are especially suited for use where both strength and handsome design are desired.

(Texeland, Ohio.

The demand for Ferrosteel Registers

Has been large, and we have yet to learn of an instance where there has been dissatisfaction, and many words of commendation have been received.

It has not been our endeavor to produce what would be known as a "cheap register," but rather to have Ferrosteel Registers superior in many respects to any other make and also to supply a complete line of sizes.

That we have succeeded is an acknowledged fact.

A large stock is kept at both our works and Cleveland warerooms, and so many leading jobbers have taken up the line that stocks are now carried at nearly every prominent point in United States.

Please address for all particulars,

THE FERROSTEEL COMPANY, 106-108 Superior Street, CLEVELAND, OHIO.

COMPOSITE LATTICE REGISTER

. . IN . . .

EMPIRE BORDER.

The Composite Lattice pattern was made for use in churches, ware-rooms and any place where extra strength is desired.

It finishes very handsomely in White Japan, Electro Bronze and Imitation Bronze, and has been largely used in these finishes for ventilating purposes.

Ferrosteel Registers
